Molded Carpet Sets

Molded carpet sets are available with your choice of original mass backing or replacement poly backing. 1994-96 TruVette is only available in mass back. Our mass back sets feature the same hard-rubber backing used by the factory to reduce heat and noise in your Corvette or, for an economical alternative, choose the jute padded, moisture resistant poly back. Cut pile carpet is original for all 1984-93 Corvettes. For 1994-96 Corvettes, TruVette was the original carpet material. All carpet sets included molded heel pads, serged bindings and velcro strips to hold floor mats in place, and door panel carpet strips. Specify color.

Cut Pile, TruRo and TruVette

1984-93 is available in original cut pile carpet. Also, the 1993 40th Anniversary is available in original TruRo carpet. 1994-96 is available in cut pile and original TruVette carpet.

Manufactured for Eckler's by the number one name in Corvette carpet, Auto Custom Carpets.

Corvette Leather Repair and Protector Kit

- Specify color when ordering

It's all here – everything you need to clean, preserve, restore, and protect your leather seat covers. Included are... Spot Remover – Removes grease and stubborn stains. Will not discolor. Leather Soap – A gentle yet effective way to remove dirt and oils. Leather Lotion – Preserves your cleaned leather and keeps it looking good. Leather Waterproof – Repels water based stains from setting in before you can clean them. Helps prolong the life of your leather seat covers. Color Cote – Used to actually re-color the worn areas of leather seats. This is not a paint, but rather, a true leather dye. Has a “leveling” effect that actually fills small imperfections. Formulated in 24 stock Corvette interior colors. Clear Cote – Seals and protects your restored leather. Protects finish and prevents abnormal wear. To order, simply select the kit that contains the correct color for your Corvette.

Instrument Cluster Service

- Have your instrument cluster rebuilt to factory specs
- One year limited manufacturer's warranty

When your instrument cluster goes completely dark, or the cluster goes dark with the high-beam and turn-signal indicators on, or if just a few random segments are displayed, you probably have a defective instrument cluster in need of reconditioning. Instrument cluster rebuild service includes complete diagnostic testing and the replacing or repairing of defective parts. Allow 7-10 working days for repair.

NOTE: Visit EcklersCorvette.com or call for complete details and where to send your parts for restoration service.

Autometer Gauge Pods/Gauges

- Custom-fit for A-pillar
- Single and dual pods

To monitor performance and to get the most out of your C4, using accurate gauges is a must. Install these easy-to-see 2-1/16" diameter gauges in the single or dual gauge pods. The pods adhere with self-adhesive tape. Each gauge with the exception of the Nitrous unit has all necessary hardware. The Nitrous gauge requires a pressure line.

Three Choices of Corvette Weatherstrip

EDPM Rubber—Imported

EDPM (Ethylene Propylene Diene Monomer) has a longer life span when compared to latex weatherstrip and at significant cost savings.

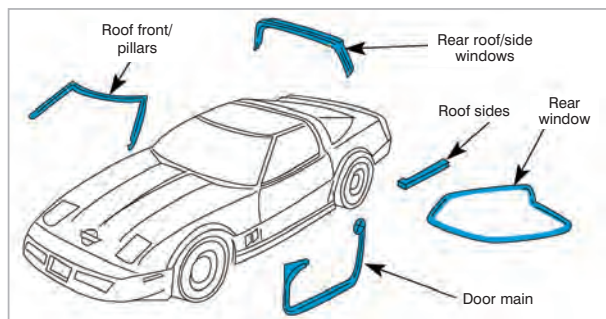

EDPM Rubber—Made in USA

Longer life span as compared to latex and at a lesser cost. Slightly better finish as compared to imported EDPM.

Latex Rubber

Latex rubber is utilized in factory weatherstrip. Has excellent finish and a higher cost compared to EDPM.

Headlight Motor Repair Kits

- Easy to install
- No need for motor

Inside the 1988-96 headlight motors is a gear which turns the lights. From the factory, the inside of the gear is packed with a special hard gel that turns the gear. As time passes, the gel deteriorates and no longer has the strength to turn the gear so it free wheels. One kit repairs one motor.

LED Taillight Kits

- Adds a unique look (when lit)
- Provides additional safety
- Much brighter than stock

When lit, this kit provides a unique red hexagon pattern. In addition, the LED's light faster than conventional bulbs thus alerting drivers behind you sooner that you're braking or turning. The kit includes 4 taillight housing assemblies, one electronic flasher and instructions and all necessary installation hardware. Installation takes about 1-1/2 hours and requires no cutting of the stock wiring harness. The kit connects electrically with a simple plug-in bulb socket installation. DOT compliant.

Outside Remote Mirror Glass Trunion

- Repairs wobbly mirror glass

When the mirror motor works and the mirror glass wobbles, it's most often a broken trunion. The trunion snaps onto the back of the glass which in turn mounts to a black plastic pivot.

Big Mouth Performance Lower Front Air Dams

- Maximizes usable cool air flow
- Decreases coolant temp's 3-6°
- Adds performance to ram air systems
- Helps to prevent water ingestion
- Keeps road debris out of radiator area

One of the many benefits of the Big Mouth performance air dam is easy installation. It installs in about 45 minutes by removing the stock spoiler center bracket and drilling 4-1/8" holes in the skid bar. The dam then fits on top of the lower radiator baffle and bolts in place. Included with the powder coated air dam is stainless steel hardware and installation instructions.

Wide-Molding Front Bumper Replica

- Fiberglass or flex-fit construction
- Bolt-on installation, fits all 1984-90's

Update your 1984-90 Corvette to 1991-96 styling with our frontwide-molding front bumper replica. Our part number 25-100753 uses 1991-96 side marker and fog/turn signal lights. With the bumper are the inner fender adapters and fog lamp bulb access doors. When ordering either bumper, order the parts listed below with the front license cover as an optional item (depending on what state you live in) and the fog/turn signal lights depending on which bumper you select.

Rain Coat® Sport Tops

- Canvas soft top for coupes
- Folds for compact storage
- Easy to install and remove

The "Rain Coat" from Fox Enterprises Inc. is a soft top for all 1984-96 Corvette coupes. It replaces the heavy stock roof panels to give you the convenience and flexibility to install a lightweight, easy to handle roof when beautiful "convertible" days turn sour. The "Rain Coat," made of soft, top quality canvas with injection molded inner foundation, installs quickly utilizing the car's stock mounting points. Velcro seals across the front and back of the "Rain Coat" for a snug, windproof, watertight fit. All "Rain Coats" have been designed and tested to be used at normal highway speeds with no problems. Storage bag included.

Roof Panel Rain Gutter Moldings

- Keeps water out of interior
- Easy to install, looks like a factory installed part

These black ABS moldings run from the front of the roof panel to the rear and divert water away from the interior. Simply affix the rain gutter molding with self-adhesive tape and snap-on fasteners. It requires no modification to the car to install and is supplied with instructions.

Coupe Windjammers

- Reduces wind noise
- No modifications required

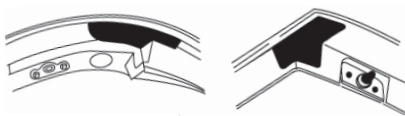

Made of tough DuPont™ plastic, the Windjammer installs in seconds to the stock roof mounts. Benefits include a 75% reduction in top-off wind noise and the tinted deflector reduces sun glare by 90%. The Windjammer stores conveniently behind the seats when not in use. To distinguish between early and late 1986 cars, see chart pictured.

Mass Air Flow Sensors

- Daily driver quality

Note: This product has a thin wire inside that measures the air flow that moves across it and tells the engine's computer it needs more or less fuel. These commonly fail all together or work sporadically because the thin wire (aka element or guide wire) breaks or grounds out causing your Corvette to stall. An easy way to check for a broken, but not severed wire is to gently tap on the MAF sensor with the handle of a screw driver while the car is running, if it stalls it most likely is a bad sensor. Two other parts that can also cause stalling are the burn-off relay and power relay, so check these too.

Throttle Performance Switch

- Instantly improves throttle response
- Delivers maximum rate of fuel and timing advance
- Plug-in installation
- 50 states legal

In just five minutes, without a single tool, you can plug-in the throttle performance switch and get an instant improvement in throttle response performance. The switch plugs in line with the throttle position sensor to deliver the optimum and maximum amount of fuel and timing advance whenever you give your Corvette at least 60% throttle. Each switch is supplied with installation instructions.

Competition Cams' Magnum Roller Tip Rocker Arms

- Dyno proven 20 horsepower gains
- Reduces valve stem and guide wear

Competition Cams' unique forge-cast roller tip design reduces friction. As a result it has been dyno tested to produce 15-20 horsepower increases and it makes valve stems and guides last longer. Magnum rockers fit all 84-85 small block engines (1.52 rocker ratio). Each rocker is supplied with a rocker ball and lock nut.

84-85 Set of 16 **25-122289^A** **179.99** set

Competition Cam's Rocker Arm Kit

- Magnum rockers produce 20 HP gain

Competition Cams has put together 2 kits that will allow their Magnum rocker arms to be used on all 86L-95 Corvettes. The kit also includes 5/16" guideplates and push-rods. The Magnum rocker arms have been dyno tested to produce 15-20 horsepower increases. The reduced friction also makes valve stems and guides last longer. Their long slot design allows you to use camshafts with much higher lift than stock cams. Each set of 16 rockers is supplied with a rocker ball and lock nut.

BPP Vortex Rammer Cold Air Systems

- Up to 22 HP Increase
- 5 MPH and 3.5 Tenths in 1/4 mile
- Replaces stock air box

The Vortex Rammer obtains cool, pressurized air from the radiator cavity, drives it through the radiator shroud into the specially designed scoop and forces it into the Rammer's sealed box. On C5's it is then routed into a revolutionary air cleaner that contains an internal velocity stack. The radiator shroud requires a simple cut-out on all installations. Available with a black or clear cover that houses the filter. Installation hardware and instructions included.

Hypertech Power Chips

- Produces instant power
- Improves throttle response
- Easy 15 minute installation

Would you like to reduce your 0-60 elapsed times by almost a 1/2 second, add up to 20 horsepower to your engine without a single modification, or have your Corvette be 2.6 car lengths faster? You can realize these improvements by installing the Hypertech Power Chip. Simply remove the stock chip from the electronic control module and install the Hypertech Power Chip. How does the Hypertech chip work? At wide open throttle, the Power Chip selects an optimum spark advance and air/fuel ratio, thereby allowing the engine to perform way beyond the limitations imposed by the stock chip. And because the Power Chip only affects wide open throttle operation, fuel economy is unaffected. The Hypertech Power Chip is available in 2 types. Street Runner is designed for stock or slightly modified Corvettes and will yield the results mentioned above. Thermo Master has been further modified to allow the use of a cooler thermostat (160 degrees). A cooler engine, of course, will make more power than a hot engine. For your ordering convenience, the 160 degree thermostats are listed below the chips along with the GM thermostat housing gasket.

MSD 6AL Multiple Spark Discharge Ignition

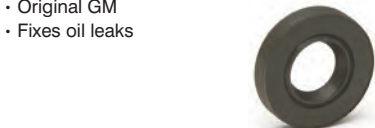

- More power and faster starts
- Better idle and smoother running

Multiple spark discharge ignition ensures a complete burn on each compression stroke. The result will give you increased fuel economy, faster starts, more power, and smoother running performance with a more even idle. This ignition system has been performance proven by professionals. Soft touch rev controls of 3000, 6000, 7000 and 8000 RPM will protect against overrev damage. Rev control is adjustable. Rubber shock mounts supplied.

Gear Reduction Starters

- Eliminates hard starting problems
- Ideal for high compression or high-performance engines
- Lighter and smaller than stock

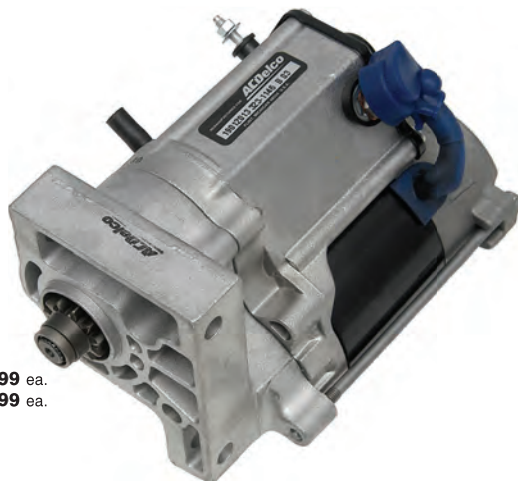

If starting problems are aggravating you, we have the cure - a Powermaster hi-torque, 4.4 to 1 gear reduction starter. It's far more powerful than any stock starter, plus it's lighter and smaller than the stock unit to make header clearance a thing of the past. And because the Powermaster starter does not act as a heat sink, it is unaffected by high header heat or high underhood temperatures. It has a billet aluminum adapter block and mounting bolts are included for easy installation.

RAM Premium Clutch Kits

- Upgrade over original equipment
- Includes pressure plate, disc and throwout bearing

Clutch kits consist of matched pressure plate, clutch disc and throwout bearing sets that have been designed for engines that have been mechanically upgraded over stock. These sets are direct replacements for stock assemblies and require no additional effort in driving. The additional torque capacity of these clutches is the result of a much improved clutch disc friction material that can withstand the added power output and aggressive driving style of today's mildly modified street combinations. Each set includes a pilot tool to make alignment of the disc a snap.

LT1/LT4 Heavy-Duty Stage II Clutch Kit

- Will handle up to 475hp
- Allows quicker revs with aluminum flywheel
- Perfect for street and track
- Attention installers: flywheel must be balanced to match the original before installation

This Stage II clutch kit is a complete high performance package including aluminum flywheel, pressure plate, clutch disc, throw out bearing and alignment tool. The 12.5 pound aluminum flywheel reduces reciprocating weight by 24 pounds for instantaneous throttle response and more rear wheel horsepower. We guarantee you will feel the increased power and enjoy the smooth operation of this high performance clutch kit.

Complete Polyurethane Suspension Kit

- Improves handling
- Provides longer service life

Step up to the improved performance provided by a polyurethane suspension kit. The kit includes: front and rear control arm bushing sets, rack and pinion bushings, rear strut rod bushings, differential carrier bushings, and tie rod end boots.

84-96**25-107693^Δ** **199.99** kit

Polyurethane Rear Spring Cushion Set

- Set of 4

Polyurethane lasts longer than rubber without changing the basic ride characteristics of your Corvette.

84-96**25-102732^Δ** **19.99** set

Split Polyurethane Strut Rod Bushing Set

The benefit of our split style strut rod bushings is self-centering installation, and they can be installed at home with a large vise. Rubber bushings frequently are installed off-center, thereby causing alignment and installation problems. The bushings are made of polyurethane with a steel sleeve to improve ride and rear camber control.

84-96**25-285233^Δ** **42.99** kit

Smart Struts and Performance Camber Rod Kits

- Increases rear wheel traction
- Reduces uneven tire wear

Give your Corvette's rear suspension the competitive edge. Smart Strut increased adjustability and rigidity improves suspension geometry, eliminating camber change during suspension travel. This keeps more of the tire's contact patch on the ground at all times. The result is improved traction and stability during hard cornering, as well as more off the line traction. Its heavy duty construction will also maintain alignment settings better than the factory components under aggressive driving maneuvers. Kit comes complete with: heavy duty upper strut rod mounting bracket, camber adjustment cams, custom poly-adjustable struts, all hardware and instructions.

Heavy Duty Rear Toe Rod Kit

- Maintains precise rear toe settings during extreme driving
- Noticeably improves handling predictability

The factory toe rod assembly is inadequate for Corvettes used in serious autocross, track time or drag racing events. The stock toe rods deflect and allow untimely and unwanted toe changes. The result is the rear tires can cause wandering, increased E.T.'s and cause the lack of a positive sense of stability when drag racing. In autocross or track time driving, the toe change will upset the car's ability to corner and reduce the drivers' confidence while cornering, resulting in slower lap times.

Bilstein Gas Shock Absorbers

- Our best performance shock
- High pressure gas
- Limited lifetime manufacturer warranty

Specifically calibrated for high performance Corvette applications, Bilstein high-pressure gas shock absorbers offer all the advantages of a gas shock, plus construction and performance features that are incomparable. Guaranteed not to fade, Bilstein shocks are 20% stiffer than original equipment shocks for true high performance and racing applications. Bilstein shocks feature a seamless, mono-tube construction for fast heat dissipation and finely machined components to yield the most sensitive valving available today. Bilstein shocks may increase the ride height of the car approximately one-half inch if the car has settled due to worn suspension components. Cannot be shipped by air.

RideTech HQ (Handling Quality) Gas Shocks

- Tuneable ride and handling quality
- Mono-tube design and 1/2" hardened shaft
- Billet end cap with integrated debris wiper
- Teflon piston wiper
- Integral internal bumpstop
- Mono-tube bore is cathode anodized
- Hard coat external anodizing
- 1,000,000-Mile manufacturer limited warranty
- Made in the USA

Over time, your gas shocks age and leak oil. As they leak, the shock will foam and can overheat making your Corvette not absorb bumps in the road as it should. It also affects handling because it can't react as fast as it should. In that case, you'll notice more body roll and a bouncy ride. The solution is new gas shocks. The HQ (handling quality) Series shocks add rebound adjustment for the driver who wants to tune ride quality and handling quality to their specific taste. A wide rebound adjustment range allows you to cruise down the road in plush comfort or firm up your suspension for those Saturday morning canyon roads! Its main advantage is that a larger piston and a more efficient oil flow path leads to cooler operating temps and more consistent performance in extreme environments. Cannot be shipped by air.

KYB Gas Shock Absorbers

- High pressure
- Great price
- Excellent replacement for original

KYB high pressure gas shocks are excellent performance replacements for both Bilstein and non-Bilstein equipped 1984-96 Corvettes. In terms of performance, KYB's are "guaranteed" not to fade! In fact, regardless of how much or how hard the shock is worked, the KYB shock still provides 100% shock absorbing efficiency - now and forever. The KYB mono-tube shock is backed by a limited lifetime warranty. KYB is an excellent selection for Corvette owners who demand life-long service out of a performance shock. Cannot ship by air.

Braided Brake Hose Sets

- Meets federal motor vehicle safety standards no. 106
- Increases pedal firmness
- Corrosion resistant stainless steel
- Set of 4
- Made in USA

Every time you apply the brakes, the factory rubber hoses expand under hydraulic pressure. Even a small amount of expansion is enough to make the pedal seem soft. Braided stainless steel brake hoses give you more confidence by delivering a faster response time and a firmer pedal.

B & B Tri-Flo Performance Exhaust

- Up to 22 HP Increase on 92-95's
- Similar results on other years (ZR1 +30, L4 +12)
- Rolled edge tips

The B & B Tri-Flo Corvette exhaust system is engineered for performance and designed for an attractive, clean appearance. Systems feature stainless steel tubing with the exclusive B & B X-flow center resonator, which equalizes the engine's exhaust pulses, creating more horsepower and torque. All B & B Tri-Flo exhaust systems are direct bolt-on replacements for the factory exhaust. All necessary hangers and brackets are attached to the system and the original factory mounting hardware is reused. Once the original system is removed, the B & B Tri-Flo system can be easily installed in about an hour with simple hand tools. No cutting, fitting or welding is required.

Borla Stinger Cat-Back Exhaust with LT Tips

- Delivers performance sound similar to C5 stinger exhaust
- Improves exhaust flow and performance
- Bolt-on installation
- All cat-back systems are 50-state legal unless noted.

Borla has recently set the standard for great exhaust sound and improved performance with their revolutionary C5 Stinger – Now they have applied the same design and manufacturing principles to the C4 and developed the same winning combination. This cat-back system is made of aircraft quality T-304 which is the highest quality stainless steel and the most resistant to corrosion and rust used in any cat-back system. The 1986-91 Stinger uses a 3" diameter pipe leading into the Y-pipe and 2 1/2" exiting the Y-pipe through LT tips. Like all Borla T-304 cat-back systems, the C4 Stinger is backed by the only million mile warranty in the business.

BBK TPI Adjustable Fuel Pressure Regulator Kit

- Tuning is accomplished with the simple twist of a screw
- Will allow fuel pressure adjustment to approximately 65PSI

BBK Billet fuel pressure regulators are a great way to tune your vehicle to obtain optimum air/fuel ratios and achieve maximum horsepower. Each fuel pressure regulator is made from high quality CNC machined billet aluminum with a long lasting anodized blue finish. This BBK fuel pressure regulator is a direct replacement for your stock preset regulator and offers the best performance and value. Note: Includes OEM direct-fit manifold runner gaskets. Great for mild to wild applications.

- Vacuum braze assembled (epoxy free)

High horsepower engines generate a lot of heat and require extra cooling. Whether you performance drive your Corvette or cruise it, keep its coolant temp in check with this high capacity aluminum radiator. It features a cast aluminum filler neck, extra strong tanks and advanced core technology, delivering lighter, more durable and cooler operations over brass and steel radiators.

Direct-Fit Aluminum Radiators

- Cools better than stock radiators due to greater surface capacity
- Longer lasting than stock radiators
- Bolt-in installation
- Limited lifetime warranty
- Made in USA

GM's 1984-96 C4 radiators have a single row of cooling tubes and plastic end tanks that are epoxied in place. These direct replacement radiators feature 2 rows of cooling for as much as 100% additional cooling surface and they have press formed aluminum end tanks that are TIG welded to the core for a permanent seal. The core of this aluminum replacement is furnace brazed which provides a leak-free core without the use of epoxy.

VATS Ignition Keys

- OE manufacturer

Because 1986 and later Corvette have specially coded ignition keys, it makes good sense to have a couple of spares. To order a key, have your local GM dealer measure the resistance on your key (it will be a 1 thru 15 value code) and order the correct key code listed below.

Security Override System (SOS)

- Simulates correct key
- See website for specific year and codes

On occasion, your Corvette's VATS system may not recognize your key's code, leaving you stranded. The SOS is an inexpensive module that when plugged into your wiring harness simulates your correct key. Nothing shows to let thieves know your VATS have been bypassed. To order your SOS have your local GM dealer measure the resistance on your computer key (it will be a 1 thru 15 value code) and select the proper code online (use keyword phrase: VATS Security Override).

Delco and Delco/Bose Radio Refurbishment Service

- Cassette, CD or tuner rebuilt as required to factory specifications
- All radio functions checked and repaired as required
- All switches and controls cleaned as required

Let Eckler's professionally rebuild your 1990-96 radio to factory specifications. Before you send your entire radio to us for service, it's best to determine if the whole radio needs rebuilding or just the receiver. If you are unable to receive any stations it's the receiver or if you can't tune the radio or the CD or cassette is inoperative, it's the head. Visit EcklersCorvette.com or call (877) 815-5799 for complete details and where to send your parts for restoration service.

Corvette from the Inside 1975-92

- Written by Corvette expert and former chief engineer Dave McLellan
- Soft bound, 8-3/8" x 9.25"
- Engineering and planning details from every phase of the Corvette
- 288 pages, 200 B&W photos and illustrations

A guided tour through Corvette history by a man who was intimately involved with America's favorite sports car for 17 years. The challenges McLellan faced in the 70s and early 80s as he struggled to lead the Corvette program from the edge of failure to resounding success serve as a wonderfully detailed case-study in how the American automotive industry relied on the ingenuity, intellect, and pure determination of its top engineers to resurrect itself from a near-fatal slump and compete once again with Asian and European manufacturers.

WeatherShield® Car Cover

- Best quality
- Repels water better, keeps car dryer
- Packs small and light
- Dries in a flash
- Fits all C4s except ZR1

The Weathershield® car cover manufactured by Covercraft is the standard in top of the line car covers. It keeps your Corvette drier, is softer against your paint's fine finish, dries faster and breathes better than anything on the market today. Technically speaking the fabric is different because the one-layer fabric goes thru the Nextec encapsulation process which non-technically speaking is the very best way to make an extraordinary fabric. In fact, this process also gives this fabric a 9 out of 10 rating for simple dust protection too! Like other Covercraft covers, the Weathershield® cover has these quality features: double stitched seams, neoprene elastic front and rear for a snug fit and

New Rack and Pinion

- New, NO core charge

The steering racks for C4 Corvette's have not been available for some time and if you find one, they are rebuilt and require a hefty core charge. Eckler's is proud to now carry an all new power steering rack! All racks have been tested and ready to install out of the box. Since they are new, there is NO core charge. These racks are for the base suspension models, (non Z51). Racks have 2-1/2 turns lock-to-lock.

84-87	Standard suspension (no Z51)	25-854182^Δ	489.99 ea.
88-96	Standard suspension (no Z71)	25-854183^Δ	489.99 ea.

NEW

Headlight Motor Upgrade Kit

- Everything is included in this simple kit to make a complete working installation
- No need to remove or replace or modify the original headlight motor "horseshoes"
- No work under the dash, no work under the car, no wheel removal
- No cutting or modifications to original equipment
- Kit contains a complete new headlight motor harness
- Easy to mount module right on the wheel well house where the relays were mounted, just drill 2 holes
- Easy to follow complete instructions included with pictures and drawings
- Uses new Corvette 1988-04 style headlight actuator electronic module
- Uses new Corvette 2000-04, new style headlight motors
- Mounting brackets are powder coated medium gloss black
- Wiring harness uses correct GM color wires and delphi weatherpack connectors
- Upgrade kit eliminates "jittery" and faulty operation caused by internal motor switches, contacts, and overloads, and also by factory relays, bad wiring, and bad connectors
- The original headlight motors are un-bolted and removed, and the new mounting brackets and motors are bolted in! "Plug and play"
- One year manufactures warranty

Lowest Price Guarantee

Eckler's Guarantee is simple: You always get the best quality parts at the lowest price! Show us the identical item advertised in any current magazine, catalog, or website and we'll match our competitor's current price, guaranteed! This offer is available only at the time of purchase and applies to in-stock merchandise only. We can't combine this with any other offer. Tires, restoration services, kits, window glass, cores, reproduction batteries, certain engines, transmissions, used parts, special order parts, and shipping and handling charges are excluded.

Find the Latest Prices on our Website

Prices in this catalog were correct at the time of printing but are subject to change. Visit Ecklers.com for the latest up-to-the-minute pricing as well as hundreds of items not appearing in this catalog. Eckler's is not responsible for pricing changes, errors, or omissions in this catalog or online. Prices are subject to change without notice.

100% Satisfaction Guaranteed

Our commitment to you: If for any reason you are not 100% satisfied with any of our products, return them for a full refund, credit or exchange—your choice.

Best Parts, Best Price

This is not just a slogan! Eckler's is committed to providing the highest quality parts at the most competitive prices. We source and select all of our parts exclusively from the world's leading brand name manufacturers using our massive buying power. This means you get the best there is, at the best prices in the market today.

Shipping and Handling

Check Ecklers.com for current shipping and handling estimates. In the catalog, denotes items that ship via truck, and denotes oversized dimensions or weight, which incur additional charges.
